

- **Limb Characteristics:**
 - ✓ Unable to maintain therapeutic graduated compression with standard garments
 - ✓ Custom compression is medically necessary to prevent progression of lymphedema
 - ✓ Failure of off-the-shelf compression despite conservative management
 - ✓ Irregular limb dimensions requiring custom fabrication
- **Conservative Treatment:**
 - ✓ Trial of elevation
 - ✓ Trial of off-the-shelf compression garments
- **Failure of Ready to Wear Item due to:**
 - ✓ Irregular limb shape or disproportionate measurements
 - ✓ Garment slippage, rolling, or bunching
 - ✓ Inability to maintain graduated compression
 - ✓ Inadequate edema control despite correct sizing
- **Medical Necessity:** Custom compression is medically necessary to prevent progression of lymphedema and related complications such as mobility limitation, skin integrity risk, infection risk and disease progression
